## Education

|  |                             |
|--|-----------------------------|
| <b>University of Washington</b><br><i>PhD Theoretical Chemistry, Advisor: Prof. Xiaosong Li</i>                    | <b>Seattle</b><br>2012–2017 |
| <b>Seattle Pacific University</b><br><i>Dual BS Chemistry &amp; Biochemistry, GPA – 3.93/4.00, Summa Cum Laude</i> | <b>Seattle</b><br>2008–2012 |

## Research Interests

- Development of first-principles electronic dynamics including multiple electromagnetic fields.
- Development of relativistic many body methods for magnetic and heavy-element materials.
- Electromagnetic response properties of dilute magnetic semiconductor quantum dots.
- Simulation of high-resolution spectroscopy and femtochemistry for photovoltaics and spintronics.

## Honors and Awards

**2016:** Chemical Computing Group (CCG) Excellence Award  
**2014:** National Science Foundation (NSF) Graduate Research Fellow  
**2014:** Bernard and Claudine Nist Endowed Fellowship in Chemistry  
**2014:** Peter Salamon Award, Telluride Science Research Center  
**2012:** Natt-Lingafelter Graduate Fellowship Award  
**2010:** NSF Research Experience for Undergraduates (REU) Fellow  
(with Prof. Michael B. Smith, Univ. of Connecticut.)

## Presentations

**2016:** "Towards a Real-Time Description of Magnetic Systems with Applications to Magnetic Circular Dichroism Spectroscopy." Poster Presentation. 251<sup>st</sup> ACS National Meeting, San Diego.  
**2015:** "Theoretical investigation of magnetic exchange interactions in dilute magnetic semiconductor quantum dots induced by defects." Oral Presentation. Pacifichem 2015, Honolulu.  
**2015:** "Linear Response Complex Generalized Hartree-Fock." Oral Presentation. 249<sup>th</sup> ACS National Meeting, Denver.  
**2014:** "Equation of motion formalism of second order many-body perturbation theory (EOM-MBPT2) and second-order approximate coupled-cluster (CC2)." Oral Presentation. 248<sup>th</sup> ACS National Meeting, San Francisco.  
**2014:** "Low-Scaling Approximations to the Equation of Motion Coupled-Cluster Singles and Doubles

Equations.” Oral Presentation. TSRC Excited States and Time-Dependent Electronic Structure Theory, Telluride.

## Professional Societies

---

2013–: American Chemical Society (ACS), Member

2012–: Society for Industrial and Applied Mathematics (SIAM), Member

## Software Contributions

---

**Chronus Quantum**: *open-source* real-time time-dependent Hartree Fock module to simulate various time-resolved molecular spectroscopies.

**Gaussian**: efficient (P-)EOM-MBPT2 modules for computing accurate molecular excited state properties.

## Computer skills

---

**Advanced:** FORTRAN, python, gnuplot,  $\text{\LaTeX}$ , MATLAB, UNIX/Shell

**Basic:** C, C++, javascript
